

Branding & Settings

The CMS is designed to be white-label and flexible. Platform administrators can adjust branding and system settings to align with the service provider or enterprise identity.

Branding Options

- **Logos:** Upload light and dark mode variants.
- **Colors & Themes:** Adjust portal colors, typography, and layout to match brand guidelines.
- **Naming:** Override display names (e.g., “Tenant” → “Department”) for internal deployments.
- **Custom Domains:** Bind branded domain names (e.g., portal.<org>.cloud).

System Settings

- **Identity:** Configure authentication providers (Entra, Google, local accounts).
- **Currencies:** Define default billing currency and FX handling.
- **Notifications:** Configure SMTP settings for system-generated emails (billing, alerts, password resets).
- **Licensing:** Apply CMS license keys or renewals.
