

Price Management

Introduction

Manage all pricing constructs for the CMS. Pricing is scoped either at the **Region** or **Tenant** level. Features include SKU and meter pricing, credits, tiered thresholds, cloning price lists, applying modeled price increases, and estimating impact.

The screenshot displays the CloudAxis Pricing interface. A modal window titled 'Standard A7 (Base)' is open, showing the configuration for a new SKU. The modal has tabs for DETAILS, TIERS, HISTORY, SKU INFO, and TIPS. The DETAILS tab is active, showing fields for SKU ID (Standard_A7), SKU Display Name (Standard A7), Display Name (Standard A7 (Base)), and Description. Below these are sections for Meter Rate and Associated Costs, each with Currency (USD), Meter Rate per Month, Meter Rate per Hour, Associated Costs per Month, and Associated Costs per Hour. At the bottom, there are fields for Meter Credits (25) and Credit Scope (Per Tenant). A dropdown menu is open for Credit Scope, showing options: Per Tenant, Per Resource, and Per Subscription. The background shows a table of existing SKUs with columns for Region, SKU, Meter, and Price.

Region	SKU	Meter	Price
Australia - North West	Basic A0 (Windows)	No	0.0000
			0.0000
			Basic_A0

Permission Level

Platform Administrator

Create or Edit a Price List

Purpose

Define rates for a region or tenant.

Steps

1. Go to Pricing.
2. Choose Region or Tenant scope.
3. Enter a Display Name and Description.
4. Add Pricing Items:

- **Meter / SKU** — Select from available meters.
- **Rate** — Enter base rate.
- (Optional) **Credits** — Enter credits to offset usage.
- (Optional) **Tiered Thresholds** — Define usage ranges with rates.

5. Save.

Clone a Price List

Purpose

Quickly create a new list by copying an existing one.

Steps

1. Go to Administration → Pricing.
 2. Select the price list to clone.
 3. Choose **Clone Price List**.
 4. Select target scope (Region or Tenant).
 5. Update details as required.
 6. Save.
-

Add or Edit Meter and SKU Pricing

Purpose

Set or adjust prices for specific meters and SKUs.

Steps

1. Open a Price List.
 2. Select **Add Meter/SKU**.
 3. Choose the desired Meter.
 4. Enter Rate, Unit, and Description.
 5. (Optional) Apply Credits or Tiered Thresholds.
 6. Save.
-

Configure Credits

Purpose

Offset costs for specific meters, subscriptions, or tenants.

Steps

1. Open a Price List.
2. Select a Meter or SKU.
3. Enter Credit amount.
4. Save.

Configure Tiered Pricing

Purpose

Apply progressive rates based on usage ranges.

Steps

1. Open a Price List.
2. Select a Meter or SKU.
3. Add **Tiered Threshold**.
4. Enter From Quantity, To Quantity, and Rate.
5. Save.

Apply Price Increases (with Modeling)

Purpose

Increase pricing by percentage or fixed amount and preview the impact before applying.

Steps

1. Go to Administration → Pricing Tools → Price Increase.
2. Choose **Scope** (Region or Tenant).
3. Select Increase Type: **Percentage** or **Fixed Amount**.
4. Enter Increase Amount.
5. Run **Model** to preview impacts across meters and tenants.
6. Review modeled results.
7. Apply changes to generate updated Price List.

Estimate Costs (Estimator Tool)

Purpose

Model tenant or subscription costs using current or proposed pricing.

Steps

1. Go to Administration → Pricing Tools → Estimator.
2. Select Tenant or Subscription.
3. Choose a Price List.
4. Enter estimated usage quantities.
5. Run Estimate.
6. Review projected cost breakdown.

Delete a Price List

Purpose

Remove an obsolete price list.

Steps

1. Go to Administration → Pricing.
 2. Select the price list.
 3. Choose **Delete**.
 4. Confirm.
